\*Required information. Please do not use a PO Box. We ask for your name and address in order to determine who your state legislators are and deliver your message. Temporary addresses also acceptable.

### To my State Legislators and Governor Inslee:

Washington's health care safety net helped us weather the pandemic, proving its importance to our state's future. Now, with state revenues uncertain, we must protect and enhance the safety net where it's needed most. I urge you to expand coverage for the uninsured, grow the behavioral health workforce, and ensure the financial stability of our community health centers.

Add your own comments about why we need to protect health care funding at this time:

While we will never share your information for profit, we may share your contact information with community health centers so that they may send you health related and other information that may be of interest to you.

## Save Health Care in Washington

**Save Health Care in Washington** is a grassroots advocacy network led by the community health centers of Washington state. Our mission is to empower people to use their voices to ensure health care access for everyone in Washington. We will send your message to your elected officials. You may get a response from them thanking you for your message.
